TECHNICAL DATA SHEET

CM-5385 **LIQUID MULTI - METAL SOAK CLEANER**

PRODUCT DESCRIPTION

CM-5385 is a liquid, mildly alkaline soak cleaner for use on ferrous and non-ferrous metals. The detergent system in **CM-5385** makes it excellent cleaner for mineral oils, quenching oils, stamping compounds, shop dirt, and cutting oils when used at a temperature of 140°F to 175°F.

FEATURES

- High detergency for maximum cleaning efficiency.
- Excellent rinsability and long tank life.
- Convenient liquid form.
- Economical to use and effective at low concentration.
- Safe for aluminum and zinc metals.

USE DIRECTIONS

CM-5385 is used at a recommended concentration of 5% to 15% by volume within a temperature range of 140°F to 175°F. Solution agitation is highly recommended.

SAFETY AND HANDLING

Refer to material safety data sheet for additional information about this product.
