TECHNICAL DATA SHEET

CM-808 LIQUID STEAM CLEANER

PRODUCT DESCRIPTION

CM-808 is a heavy-duty liquid steam cleaner designed to emulsify oils and greases and rapidly penetrates carbon smut, shop dirt and other common soils to allow for quick and easy removal of surface soils upon rinsing. **CM-808** is excellent for the removal of heavy, tenacious soils such as greases, corrosion inhibitors and carbon smut buildup.

CM-808 is non-toxic, contains no phenols, cresols, aromatic solvents or cremates, is unaffected by hard water, produces no offensive odors and is free rinsing, leaving no spotting.

CM-808 is excellent for cleaning heavy machinery, equipment and parts coated for storage.

USE DIRECTIONS

Apply **CM-808** at a 1% to 2% concentration by volume through a high-pressure spray washer capable of applying fluids at 1000 psi to 2000 psi at a temperature of 165° F to 185° F. Allow **CM-808** cleaning solution to remain on part for two to three minutes then rinse thoroughly with water. Heavier soils may require increased temperature and/or application time for complete removal.

CAUTION

Contains alkali salts. For skin contact, flush with water. For eye contact, flush with water for fifteen minutes and obtain medical attention.
